

Player Pre-Existing Medical Consideration

If a player is injured and needs to be transported to hospital it will be useful in certain cases if knowledge of pre-existing medical conditions are available to hospital staff. An example would be in the case of a head injury where the information regarding pre-existing medical conditions could not be given by the player.

Below is a suggested medical emergency card that can easily be completed by the player at the start of the season.

Player Emergency Information Card	
Player's Name:	Date of Birth: / / day month year
Address:
